DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Zeck et al (6723375). Zeck et al discloses the same invention as claimed: support structure (12, 34, etc.) to maneuver along utility path, means carried by the support structure for locating (it is sensor arrangement within the support structure) and marking (paint sprayer 42) a proximate vertical position of said underground utility; articulating arm 60.

Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Boon et al (6053260). Boon et al discloses the same invention as claimed: support structure (tool body); means for locating (GPS or GIS on the tool); spike driver 28 (see col.3, lines 41-51).

Claims 2-3 and 5-35 are allowed.

Art Unit: 2862

Applicant's arguments with respect to claims 1-35 have been considered but are moot in view of the new ground(s) of rejection.
